DETAILED ACTION

Response to Amendment

1. Claims 1-10 have been cancelled. Claims 11-20 have been added. Claims 11-20 are pending.

Priority

2. Acknowledgment is made of applicant's claim for priority under 35 U.S.C. 119(a)-(d) based upon an application filed in Denmark on 21 January 2003. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

3. Claim 1 is objected to because of the following informalities: in line 4, "lest" appears to be a typographical error and should be amended to - - least - -. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Giuffridal, US 3,964,985 A ("Giuffrida").

Claims 11-13: Giuffrida teaches a device (see fig. 1), comprising a first compartment (intermediate acid compartment) 6a being at least partially defined to an exterior by a first barrier 2a permeable for a set of species, and a second compartment (intermediate salt feed compartment) 6b being separated from the first compartment 6a by a second barrier 2b only for a subset of species; and wherein only a subset of species that permeates into the first compartment 6a permeates further on into the second compartment 6b (see col. 4, ll. 3-59).

5. Claims 11- 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Yao et al, US 3,994,799 A ("Yao").

Claims 11-16: Yao teaches a device 1 (see figs. 1 and 2), comprising a first compartment 4 being at least partially defined to an exterior by a first barrier 5 permeable for a set of species, and a second compartment 6 being separated from the first compartment 4 by a second barrier 8 only for a subset of species; wherein only a subset of species, such as glucose, that permeates into the first compartment 4 permeates further on into the second compartment 6 (see col. 6, ll. 3-15, and col. 12, ll. 45-61).

Allowable Subject Matter

6. Claims 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter:

Claims 17-20: The prior art of record does not teach the device of claim 11, including: pressure-sensing means that sense the pressures in the compartments.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

WO 91/04704 A1, US 5,240,713 A, US 4,822,336 A, US 4,608,048 A, US 3,905,886 A, and US 3,869,364 A closely relate to the subject matter of the Applicant's claims. The Examiner suggests reviewing these patents before responding to the present Office Action.
